  <section id="about">
    <h2>About Sunrise Market</h2>
    <p>

      This is a demonstration of an HTML-only e-commerce layout:

      - Inline images via SVG (no external image files).<br />

      - Cart + checkout implemented as a single HTML form that posts to
an email address using <code>mailto:</code> (suitable for prototypes
or tiny sellers).

    </p>

    <h3>How to deploy / improve this store</h3>
    <ol>

      <li>Replace the <code>mailto:orders@example.com</code>
address in the form action with your real store email.</li>

      <li>For real cart behavior (dynamic totals, persistent cart, secure
checkout) you'll need JavaScript and a server or payment provider
(Stripe, Razorpay, PayPal). This demo intentionally avoids JS per your
request.</li>
```

```html
    <li>You can extract each product to its own static page (linking back
to the cart) or add server-side processing to accept orders
automatically.</li>

  </ol>

    <p>Questions or want this converted into a full multi-page site with
CSS + JS + a real checkout? Tell me which payment provider you want
and I'll generate it.</p>

 </section>
